

MIHAI D. VASILE

*Abstract.* The present paper presents the result of the work of scientific researchers at the Romanian Academy's Institute of Philosophy and Psychology "Constantin Rădulescu-Motru" in cooperation with specialists in the field of logic from prestigious universities and cultural institutions of Romania. The main goal of the *History of the Romanian Logic* was to disclose to interested public the Romanian logicians' contributions to the development of this domain, starting with the first writings that were preserved until the present day. The seven parts of the book comprise data about the beginnings of logical investigation and setting up of the Romanian specialized terminology, the development of Romanian university instruction in the field of logic until the Second World War, the main contributions in mathematical logic, dialectic logic, systematic logic and history of logic, the results of research in the field of logic of important contemporary authors, and also the presentation of some Romanian contributions within juridical logic.
